## Construction Package Workshop

Alan Ross  
CEO CPSISC

## Purpose of this workshop

- My job is to give you an idea of where CPSISC is going in the future.
- Andre Lewis will brief you sufficiently to enable you to feel comfortable to use the package effectively.
- Hopefully answer any questions you may have.
- Brendan Mulhall will explain the continuous improvement process and the way things will be handled in the future. He will also take you through some professional development this afternoon and sow the seeds for a strong network.

## Before Starting

- Note that CPC08 is up on NTIS and you can place it on your scope provided STA is OK.
- The CD's provided are in word format current as at 4 March 2009 so that you have copies to work with now.
- We will send you each a further copy about a week after it goes up in normal format on NTIS as we want to ensure that we have all NTIS typographical corrections included in your version.
- No content changes are expected.
- Implementation Committee

## Future of CPSISC

- We are here for the long term - several years funding in place and built into all key processes.
- Moving to enshrine the ISC's in legislation.
- Almost completed rationalization of packages - down to one for Construction and almost finished down to one for Property.
- Focus will be on implementation.
- Workshops on new resources centre are part of process.
- IT and direct contact to be foundation stone for future work - continuous improvement, web site enhancements etc.
- Implementation committee.

## Environmental Scan

- New scan submitted to DEEWR 28 January 2009.
- World Financial Crisis made projections into future difficult.
- Scan makes it clear that we need to work hard now on skills and workforce development to ensure that we are in a position to be at front of the pack in the future.
- Key themes in scan:-
  - Impact of WFC;
  - Sustainability;
  - Technology;
  - Globalization;
  - Efficiency - non completions and mentoring;

## What will we do to build relationships

- Continue to make sure our stakeholders feel valued and listened to;
- Accessibility - spend more time out there with industry and at workshops;
- Increase our responsiveness;
- Continue to work closely with STAs and State ITABS;
- More sensitivity to industrial issues;
- Do our best to simplify the system and expedite processes.

# Networking opportunity

## CPSISC Skills Conference

28 - 29 July 2009

Sydney

This is an important date for your calendar.

A conference program is available at [www.cpsisc.com.au](http://www.cpsisc.com.au)
