

# Helping learners and job seekers to access career pathways

Construction and Property Services Industry Skills Council (CPSISC) plays a valuable role in helping learners and job seekers to access career pathways and workplace training using training packages. This means we are focusing our efforts on helping you to develop the skills and knowledge you need by participating in workplace training.

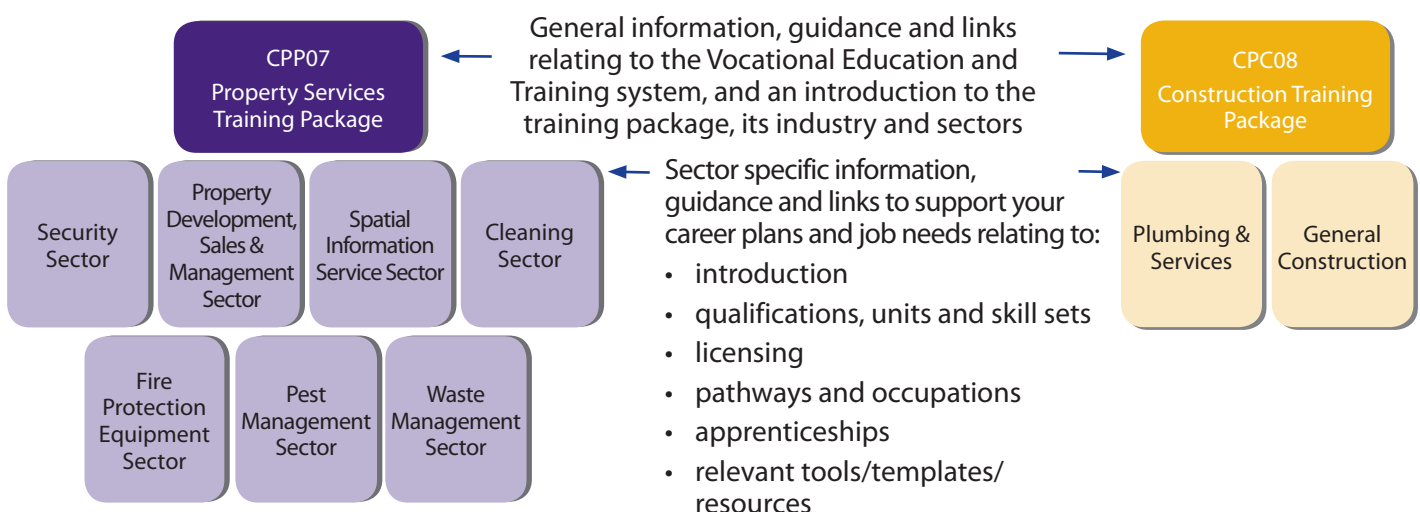

With this in mind, we have developed two major products which are now available on our website homepage at [www.cpsisc.com.au](http://www.cpsisc.com.au):

## Resource Centre

- ✓ Access career websites and information about jobs that might suit you
- ✓ Find out what skills are needed and how you can gain those skills
- ✓ Access information about apprenticeships and traineeships
- ✓ Access training package user guides to help you to understand how our training packages can help you
- ✓ Access a vast array of relevant resources and links to help you to navigate the complex VET system (eg. licensing websites etc.)

## Training Package User Guides
